

4th Green Carbon Webinar Series

July – September 2021

The UK Biochar Research Centre is pleased to announce the summer edition 2021 of our Green Carbon Webinar Series. Similar to previous years, each session will feature two 25-minute talks about current research projects or company profiles in the field of advanced carbon materials. The talks are followed by a live discussion to give the audience the opportunity to discuss open questions.

! Call for speakers !

We invite interested researchers, professionals and companies to apply before
27th June 2021

Presentation dates July - September 2021

Why get involved?

- Participate in a webinar series focussing on cutting-edge research and applied science
- Extend your academic and professional network
- Increase your visibility to future collaborators through uploaded and stored online presentations

How do I register as a speaker ?

- Send a short abstract about the topic of your presentation
- Include some information about yourself: e.g. university or company affiliation
- Please send to c.wurzer@ed.ac.uk before 27th June 2021

Topics

- The webinar series will focus on all aspects of:
 - Biochar • Hydrochar • Activated carbon
- For previous topics visit www.greencarbonwebinar.org/videos

What you need to participate

- A computer with internet connection
- Zoom application (free download) and our webinar link

Registration or questions per e-mail to c.wurzer@ed.ac.uk

4th Green Carbon Webinar Series

July – September 2021

How the webinar works

- Sessions will take place on Thursdays at 3 PM Central European Summer Time / 2 PM British Time Zone.
- 2 presentations á 25 min per session followed by a short discussion.
- The webinar will use the 'Zoom' platform - <https://zoom.us/join>. The application allows to share your presentation live with participants. Online tutorials are available on YouTube.
- Interested participants only require a link to join the presentation, which will be distributed via the registration e-mail list.
- The lectures will be recorded and uploaded to a dedicated YouTube channel to increase the visibility and audience beyond the live sessions.

Visit www.greencarbonwebinar.org/videos for recordings of the previous presentations

Audience

- The audience is expected to consist mainly of academics and knowledgeable public
- Webinar invitations will be distributed per e-mail lists of participating research groups
- The Green Carbon network will be utilised to promote the series to interested academics and the public
- The webinar series will also be promoted in relevant organisations (e.g. IBI,...)
- The recorded presentations will be uploaded on a YouTube channel to increase the audience

Organised by

The webinar series is organised by Christian Wurzer, PhD student at the UK Biochar Research Centre (University of Edinburgh).

Since 2009, the UK Biochar Research Centre (UKBRC) has led strategic, multidisciplinary investigations of biochar such as:

- Biochar production and analysis of energy rich co-products
- The diverse potential applications of biochar; particularly as a beneficial soil amendment, as well as other uses
- The feasible development of Pyrolysis-Biochar systems and LCAs for sustainable resource management.
